OBJECTIVE:

Obtain a challenging position with possibilities for further career advancement utilizing computer aided drafting skills and construction experience.

EXPERIENCE:

Barvista Homes Inc., Berthoud, CO 80513, 6-06 to 1-09

Design and draw complete construction plans for custom single and multi-family modular homes. Compile sales packages for presentation to the customer, redesigning the floor plans as requested. Complete production design packages including: framing, elevations, electrical, HVAC, plumbing, appliances and fixtures. Upon completion, assemble state approval packages prior to production. These included drawings required to meet state codes. Work with production floor employees to resolve any issues that arose during construction.

Alles and Associates, LaSalle, CO 80645, 3-05 to 1-06

Working directly with surveyors collecting data for commercial and residential properties. Setting up, drafting drawings, and writing legal descriptions for Recorded Exemptions, Improvement Surveys, etc. Work with surveyors in the field, locating property corners, section corners, and buildings in conjunction with property lines and easements.

A.E. Associates, Greeley, CO 80634, 4-97 to 2-05

Work with numerous engineers and designers laying out plumbing and HVAC systems for local and out of state architects. Upon receipt of architectural drawings, set reference drawings for system layout in conjunction with company set drawing standards. Provided input for updating and maintaining company design standards to provide clear concise drawings for use by contractors, architects and owners. Review and revise contractor submitted drawings for meeting job required specifications and quality standards. Research key components that would meet job specifications. Specific jobs include: Colorado Convention Center, Blackhawk Casino and Westin at DIA.

Scull Construction, Rapid City, SD 57709, 3-95 to 1-97

Work directly with architects and subcontractors/suppliers with submittal process. Format and produce submittal schedules for all jobs. Review and interpret job specifications and blueprints. Review product data and shop drawings for compliance with job specifications. Design and draw foundation/footing details per code for steel building construction. Part of crew erecting and finishing steel building construction.

Design, draw and compile construction drawings for custom residential home. Work directly with mechanical and electrical contractors on detail construction drawings.

General site layout with transit and laser readout (Top Con). Locate control points working drawings and transfer with Top Con to job site.

Uecker Construction, Pierre, SD 57701, 8-88 to 5-92

Foundation/footing layout – Set forms and laid concrete for footings, floors, walls and all types of flat work. Operated numerous concrete related power tools and equipment. Maintained work vehicles and equipment.
